# Employee Share Schemes

AN OVERVIEW AND COMPARISON OF DIFFERENT APPROACHES

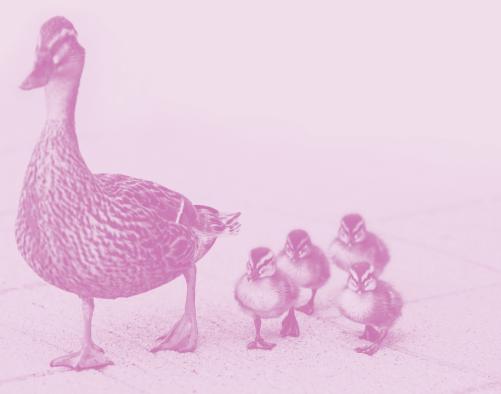

Employee share ownership is a powerful way of encouraging employees to think like owners, helping make a business more profitable.

Share schemes can also provide significant tax advantages to companies, employees or both, making them a highly cost-effective way to deliver long term reward.

With over 20+ years of experience, we help hundreds of companies of all sizes from early start-ups to large and established, and from a wide range of sectors with their share schemes.

Therefore you can be sure that when you chose to work with us you are getting an experienced team who will tailor the best share scheme approach for your company and its employees based on what you want to achieve.
